## SUPERIOR HANDCRAFTED TECHNOLOGY

The mix of grinds in your Vokey wedges is the key to creating the ultimate optionality in your shot making. For every shot, every lie, every course, there's a grind fit for your swing.

### L GRIND

For precise players and firm conditions.

### M GRIND

For players who like to manufacture shots around the green.

### F GRIND

For players preferring a full sole for full shots.

### S GRIND

For players who prefer square faced shots with a simple technique.

### D GRIND

For players with a steeper angle of attack.

### K GRIND

For players requiring forgiveness in a wide, full sole.

## WEDGE FITTING & SELECTION

### GAP FITTING

Vokey recommends 4°-6° of loft separation between wedges. This results in more stock swings, producing better results.

PW (43° - 44°)	48°	52°	56°
PW (43° - 44°)	48°	52°	58°
PW (45° - 46°)	50°	54°	58°
PW (45° - 46°)	50°	54°	60°
PW (47° - 48°)	52°	56°	60°
PW (47° - 48°)	52°	58°	62°

### GRINDS & BOUNCE

Once the gap fitting is complete, hit all the grinds within the prescribed loft side by side. Focusing on swing type (Sweeper/Digger) and course conditions (Firm/Soft). The first bounce and grind test is for full swings.

PW	46°	46.10 F	GW	50°	50.08 F, 50.12 F
	48°	48.10 F		52°	52.08 F, 52.12 F
SW	54°	54.10 S, 54.12 D, 54.14 F	LW	58°	58.08 M, 58.10 S, 58.14 K
	56°	56.08 M, 56.10 S, 56.12 D, 56.14 F		60°	60.04 L, 60.08 M, 60.10 S, 60.12 D, 60.14 K
		62°		62.08M	

### GREENSIDE VERSATILITY

Choose wedges that complement one another and are capable of unique shots. Vokey likes to recommend a higher bounce sand wedge and a lower bounce lob wedge as a general thought. This prepares a player for multiple shots and conditions.
